

■ Quality of life

The Twin Cities are placed high on the US 'livable city' index. One reason for this is certainly their efforts to be sustainable cities. What would make a town or a city livable for you?

- geographical situation – lake, mountain, coast etc.
- open spaces
- trees and flowers
- beautiful buildings
- good transportation
- good links to other places
- wide range of goods and services on offer
- affordable housing
- good food locally available

Can you think of anything else?
