

You and some of your friends have invented a car washing robot. Now you want to build a prototype and need as much publicity as possible. Therefore, you want to publish an article in an international magazine for young inventors called *Changing the World*.

| Advantages |
|---------------|
| energy source |
| cost |
| size |

In your **article** you should:

- describe how you came up with the idea
- point out the main features of your design
- outline your plans for creating one other type of cleaning robot

Give your article a **title**. Write around **250 words**.
